SUMMARY

Front-end developer skilled in React.js, JavaScript, and responsive UI design, experienced in building clean, user-focused web applications. Eager to expand full-stack capabilities while delivering scalable, impactful solutions in real-world projects.

EDUCATION

Sandip University Nashik, Maharashtra
Bachelor of Technology in Computer Science and Engineering *Aug. 2022– May 2025*

Amrutvahini College of Engineering - AVCOE Sangamner, Maharashtra
Diploma in Information Technology *Aug. 2019 – May 2022*

EXPERIENCE

Software Developer Intern Aug 2023 − Dec 2023
Innovates Technology

- Developed responsive web interfaces using React.js, HTML5, CSS3.
- Created reusable React components and hooks to accelerate development speed across projects.
- Collaborated with senior developers to optimize reusable code modules and improve UI/UX.
- Assisted in project deployment and real-world problem-solving in live environments.
- Implemented API integrations and state management to enhance user experience across different devices.

Web-Based Application Developer Intern June 2023 − July 2024
NullClass

- Contributed to live web applications as part of an agile team using React.js and Node.js.
- Assisted in designing and building user interfaces using HTML, CSS, JavaScript.
- Implemented backend logic and API integrations for feature modules.
- Enhanced performance and responsiveness across devices and browsers.

PROJECTS

Anime Streaming Platform | *React js, Node.js, Express.js, MongoDB* Feb 2024 − Present
- Developed dynamic, component-based UI using React.js with React Router for navigation.
- Integrated Express.js and MongoDB for building RESTful APIs and storing anime data/user accounts.
- Implemented user authentication using JWT, including profile management and watch history.
- Used custom React hooks for search/filter functionality and responsive layouts for mobile devices.

Online Retail Store (E-commerce Website) | *React.js, Node.js, Express.js, MongoDB* May 2024 − July 2024
- Built the front-end using React.js, managing routes, global state (Context API or Redux), and reusable components.
- Designed product pages, shopping cart, and order summary pages with conditional rendering.
- Implemented role-based authentication for users and admin with secure login (JWT).
- Backend API powered by Node.js + Express.js, handling CRUD operations and MongoDB database integration.

ERP Software | *React.js, Node.js, Express.js, MongoDB* June 2024 − July 2024
- Developed teacher dashboard to manage student attendance, track individual performance, view period-wise schedules, and upload subject notes.
- Implemented student dashboard where students can monitor their own attendance records, review previous semester marks, and download uploaded subject materials.
- Enabled real-time data updates using RESTful APIs built with Express.js and persisted in MongoDB.
- Added real-time filtering and search functionality to quickly locate notes based on keywords.

TECHNICAL SKILLS

Languages: Java, C/C++, MongoDB, JavaScript, HTML/CSS
Frameworks: React, Node.js, Express js, WordPress, Material-UI
Developer Tools: Git, MongoDB, VS Code, Figma, IntelliJ
